INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/SG2004/000152

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims 1-25	YES
	Claims	NO
Inventive step (IS)	Claims 1-25	YES
	Claims	NO
Industrial applicability (IA)	Claims 1-25	YES
	Claims	NO

2. Citations and explanations (Rule 70.7)

Claims 1-25 meet the criteria set forth in PCT Article 33(2)-(4) for novelty, inventive step and industrial applicability. The prior art published before the priority date does not disclose a silicon microphone and a method of forming the microphone from two bonded wafers as defined in the claims.

The closest prior art is considered to be US 5408731. This document discloses forming a microphone from two bonded wafers but omits many of the steps that are defined. In particular there is no disclosure of etching a cavity through an oxide layer on a major surface of a first wafer into the layer of heavily doped silicon that exists in this wafer, and then bonding the first wafer to the second wafer before further processing.
